TARGET

Every athlete knows the importance of lightweight, fast, high-performing gear especially if time is of the essence. The Base Lite was designed for the pilot who craves epic sky-camping adventures, travelling the world, and the occasional top-to-bottom comfort flight. Move freely, expand your playground and be the first to base with the Base Lite.

DESCRIPTION

The Base Lite is the best Sport class paraglider we have ever made. Based on the EN-B Base, it pulls out all the stops in terms of technology. Lighter weight means reduced inertia, reduced shooting, increased roll stability, and easier, sharper handling. Bruce has added 3km/h to the top speed, and the ultra-streamlined PPSL and Dyneema micro-lines reduce drag to improve performance. Plastic wire reinforced leading-edge miniribs create a solid leading edge by essentially adding 80 cells without the weight/seams of full ribs. In addition, the Base Lite has a strong shark nose, Cord Cut Billow, and Bruce Goldsmith Handling.
