SPECS

FLAT AREA (m ²)	37	42
TAKEOFF WEIGHT (kg)	100 - 200	120 - 220
FLAT ASPECT RATIO	5.5	5.5
GLIDER WEIGHT	7.2	7.9
NUMBER OF CELLS	52	52
TRIM SPEED (km/h)	40	40
MAX. SPEED (km/h)	52	52
CERTIFICATION	EN/LTF-B	EN/LTF-B

DUAL 2

ABOUT

Designed for pilots who require flawless take-off characteristics, the DUAL 2 takes the load quickly and the short run required is a huge step forward for passenger safety. We want our pilots to feel in control. We designed the DUAL 2 to be informative and comfortable, enhancing the whole experience. Deliver unforgettable experiences with the DUAL 2, every flight!

TECH

The DUAL 2 is an entirely new design. It's a pleasure to launch and to fly, with light, intuitive BGD handling and an outstanding sink rate, making it a 'top of the stack' performer. We've made the DUAL 2 in two sizes: the 42m² will suit most, and the 37m² is for all-up weights below 200kg. Big ears are effective and easy to use, and we've added a new big-ears locking system. We know commercial pilots need tandems that last well so we've made the DUAL 2 robust and strong, with durable cloth throughout and all-sheathed Kevlar lines. Hard-working trimmers get worn, so we've made ours easy to replace and included spares with the package.
