TARGET

Three, two, one, booster ignition and we have lift-off for the LUNA 2. The mission of our out-of-this world PPG wing is to widen the possibilities of airborne exploration for intermediate pilots up to competition racers. This hi-tech, versatile craft will carry pilots on discoveries of new horizons, and back again!

DESCRIPTION

The LUNA 2 is specifically made for powered paragliding. It is the perfect blend of comfort, performance and speed with BGD's trademark handling. Designed from the record-breaking LUNA, the LUNA 2 is even better, now with a strong shark nose. It has a re-optimised reflex profile, a new elliptical arc and CCB 3D panel shaping. Brand new risers have dedicated tip-steering handles, trimmers and speed bar. With all these new features the LUNA 2 is ready - over to you to dream up exciting missions.
